

“What Kind of Cactus Is It?” - Gary Duke believes that anyone interested in cacti ought to be able to determine what genus a cactus plant belongs in just by examining it and looking for a few telltale signs. What do you look for? Come, learn and find out. If you know the genus, then you have a clue to the growth characteristics and flowers a plant will have. You will know if someone switched the name tags at your favorite box store. This is a tutorial on many of the small globular cacti families and their identifying characteristics – will it be tall or short and squat, will it have big or small flowers, is it from North America or South America. If you don't like cacti, well he has lots of pictures of pretty cactus flowers to look at. Come and learn! (He has hand-outs too). (~ 1.25 hr)
